

coin and medal artist

2023

My passion for art was born when I was a child; after having done an artistic training course, I graduated in Rome, at the school of the Italian Mint, where I learned all the basics to design and sculpt a medal. I specialized in coins in the United States, where I attended sculpture courses and expanded my knowledge with modern techniques.

My job is to develop a design through a theme; it is no easy, because my job is to make sure that everything I want to express is perceived even within such a small circle, in metal, most of the time without the aid of the color. This is why I try to summarize symbolism and realism in my drawings, which must be perceived quickly and immediately.

I like working with clients and dealing with different artists from all over the world, I find it essential for my work and very rewarding. I am always looking for new techniques of execution, trying constantly update my working process but at the same time I do not forget the traditional method of hand modeling, which I believe is the only one able to restore a freshness of sign and unique vibrations.

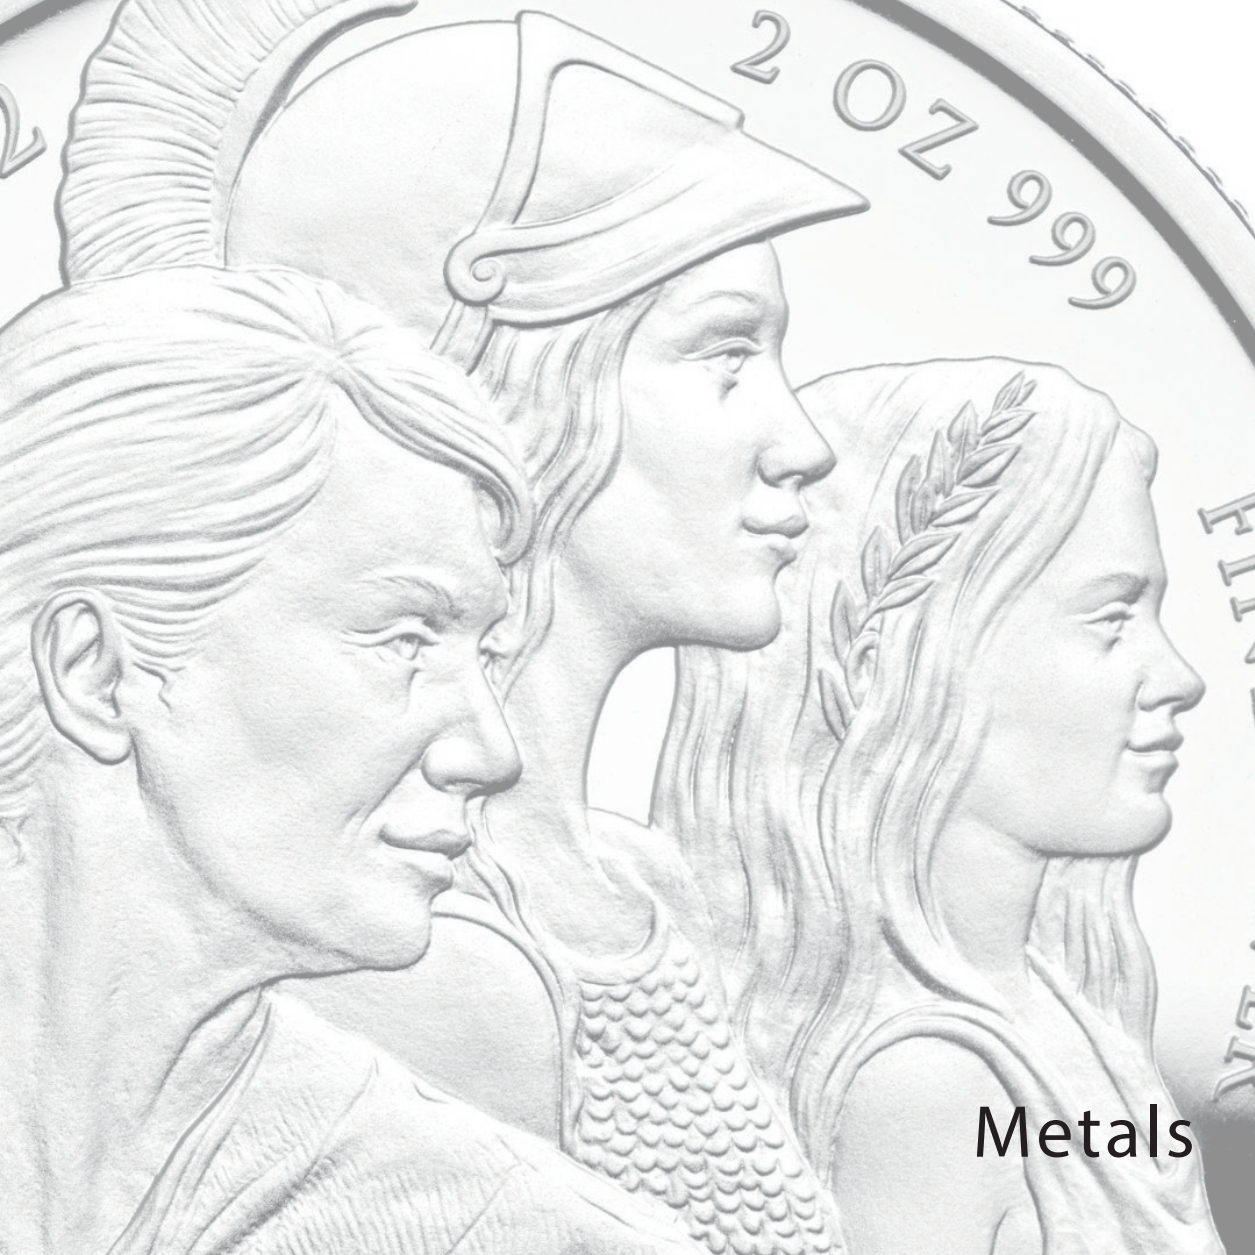

I combine quality of work and speed of execution, as far as possible, always in agreement with the client step by step during the working process.
